PALLADIOM
CONTROLS

精准刻字

很明显需要进行文字负空间刻字处理也就是通常说的面对大片留白的反向视觉效果. 这样就可以做出多种复杂图标

Obvious need to engrave negative space of fonts also known as **counters** of **eyes**.

This opened a broader range of complex symbols and icons.

刻字

我们看一下
传统的做
法.....

刻字
我们采用
先进的网格工艺

网格消失了
当按键背光点亮时

多种图标可选

这种水平的**精准刻字**需要采用最先进的技术，就像印刷电路板一样精准。

动态背光管理(DBM)

传感器

动态背光管理

背光变亮显示按键场景被激活，
这个背光亮度会根据空间环境光的
照度度自动调节。

Status Symbol

- 把路创的面板如同陈列在墙上的精美珠宝。
- 优雅的视觉语言，无限的可编程性和定制性，以及直观的控制重新定义了智能面板最好的工艺

墙面优雅赏心悦目

PALLADIOM

BESPOKE METALS

Inspired by old world craft and instilled with modern technology, Palladiom controls harness the power of light to curate the perfect scene with a single button press.

Now, you can marry these controls with a classically designed, solid brass, unfinished metal faceplate.

Heavy and crisp, with perfect edges and corners.

Pair that beautifully crafted faceplate with a finish from Focus-SB, for a distinctive, tailor made solution for your most discerning customers.

Choose from 20 standard as well as hundreds of custom finishes. Easily coordinate with or complement other hardware, fixtures, or accents in a home, ensuring design continuity.

And do it all without sacrificing the Lutron quality and intelligence you'll find in a Palladiom keypad.

Hallmarks of that quality and intelligence include **backlit engraving and dynamic backlighting**. Backlit engraving, which can be customised, provides a visual guide in a dark room. Dynamic backlighting brightens to indicate an active scene and automatically adjusts to ambient light levels in the space.
